E-Sheet: Electricity Connecting Our Life to the Web: Post- Session

What do you think is our most used source of light? Well besides the sun our society uses mostly electricity. Think back to the last time your community lost its electricity. It really is an important part of our life so lets learn a little bit more about it.

Sites to Explore:

Frankenstein's Lightning Lab <http://www.miamisci.org/af/sln/frankenstein/index.html>

Welcome to Electricity: <http://www.thetech.org/exhibits/online/topics/10a.html>

KidsKonnnect: Electricity: <http://www.kidskonnnect.com/Electricity/Electricity.html>

Electricity and Magnetism: <http://edtech.kennesaw.edu/web/electric.html>

1. Let's start with some safety fun! Click on **Frankenstein's Lightning Lab** and go to the Safety site there. Enjoy this quick review on electrical safety. So tell me what you learned.....

2. Now lets learn a little about Electricity. Go to **Welcome to Electricity**. Go through the first four buttons listed and ask your teacher what activities they want you to do or skip. Explain three things you learned from this tour in the space below.

3. The last two sites **Electricity** and **Electricity and Magnetism** are up to your teacher to decide what you should do. They are designed to let you finish up your exploration on light, lightning, and electricity. Ask your teacher what sites you should explore. Enjoy!!
